Treefrog Software Ltd. is a bespoke software development and training company, specialising in the development and installation of products that support the Total Productive Manufacturing (TPM) methodology.

Our Aim To be the preferred partner for organisations seeking to implement and support TPM.

Our Clients We currently support a number of blue-chip clients in the FMCG, Chemical Process, Component and Assembly Manufacturing industries.

These clients are using our products as key components of their drive to achieve World Class levels of performance and their decision to partner with Treefrog Software Ltd reflects the lead we have taken in this field.

Our People All our staff have been drawn from senior management and professional positions in industry and commerce.

We can claim an unrivalled background in the requirements of TPM programmes and list a number of TPM professionals amongst our employees.

When combined with the abilities of our professional programming and support staff, we can ensure that we supply the best products available to support TPM and consistently deliver outstanding value to our customers.

To provide a cultural perspective to our software solutions.

Enable industry to fully utilise the 8 TPM Pillars and support their TPM Loss, Cost & Waste programmes.

Supporting Industry's Drive for World Class Manufacturing

Technical support and backup tools give the customer confidence and control over their business.

Enable cross fertilisation of best practices across manufacturing sites within industry.

Develop alliances with Blue Chip companies to develop "effective" business software solutions.
